DAISEIKAI

TOSHIBA

Leading Innovation >>>

All New design >>>

Elegant Flat grille design

Top-class energy efficiency >>>

The new Daiseikai achieves both SCOP A+++ and SEER A+++ which represents the highest level of energy efficiency.

Maximum comfort >>>

Dual Air Flap, Horizontal & Vertical louver

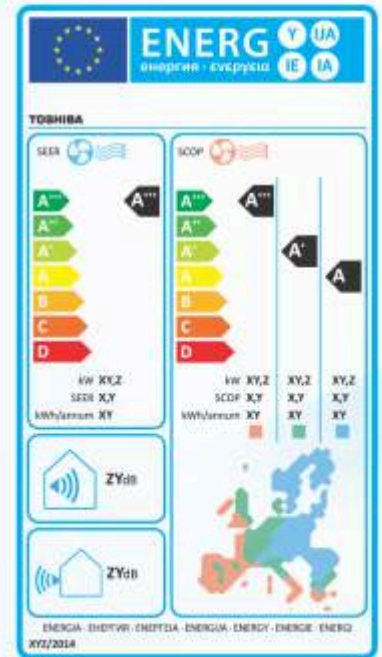

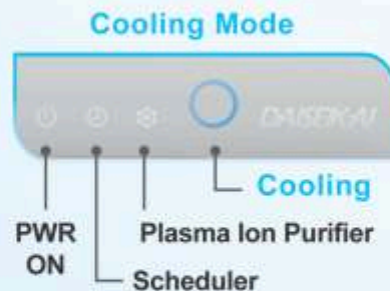

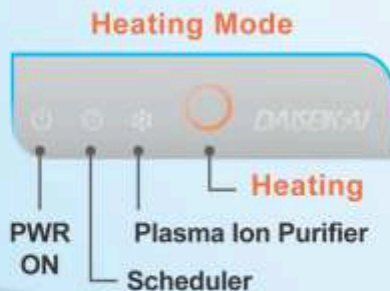

The new Horizontal and Vertical Louvers improve comfort with a choice of powerful airflow and mild airflow for comfortable and consistent temperatures.

Intelligent control >>>

Illuminated Light power On/Off

Illuminated light indicates each operation in a different color and can be turned off at any time.

DAISEIKAI

New Plasma Ion Purifier System >>>

New Toshiba Air Purifying System >>>

Double Freshness : Plasma Ion Charger & New Ionizer System

Make your home a hideaway from dirt and discomfort. The new Daiseikai is equipped with a new innovative Plasma Ion Purifier System, a complete filtration system to deodorize air and provide a pure and healthy environment. The Plasma Ion Charger and New Ionizer System provides pure air and keeps your skin moisturized. Negative ions create a fresh and healthy environment, absorbs and decomposes smoke, food smells and bad odors.

New

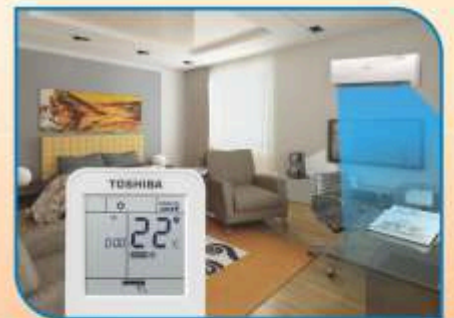

- Ultimate relaxation through 3D Air Flow
- Enhanced installation flexibility
- 6 unique airflow patterns

21°
Louver

3D Airflow >>>

Improved comfort by distributing powerful and stable air volume in 6 unique airflow patterns

With 3D airflow features, the indoor unit provides further airflow and stable air volume in 6 unique patterns to ensure comfort. New Horizontal and Vertical louvers improve comfort by evenly distributing air for a comfortable and consistent temperature.

Wide or spot airflow is made possible by combining the horizontal and vertical louvers patterns. You are able to install the unit more flexibly as the airflow is horizontally & vertically controlled in the area you are staying. Simply control the airflow pattern as you wish through the remote controller by pushing the "Air Flow" button.

Weekly timer >>>

Weekly timer remote controller for all year round comfort

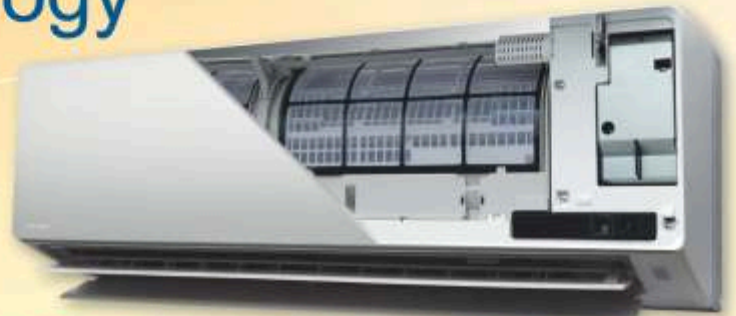

With Weekly timer features, the Toshiba air conditioner can be programmed with up to 4 different settings in a day (24 hours) and 7 different programs in a week. Settings comprise On/Off times, Temperature control, Operation mode, and Fan speed. The Remote controller is equipped with Weekly timer as a standard function* to provide convenient and maximum comfort to every user. Furthermore, this function also helps make energy saving easy.

Timer setting example >>>

Toshiba technology

Electronic boxes are fully enclosed and protect from shock and burn as per IEC Standards.

DC Twin-Rotary Compressor >>>

Toshiba engineers have developed a new outdoor unit to further improve existing technology. The new DC Twin-Rotary compressor* provides high efficiency compressor operation at low sound levels.

Energy saving

Increased, wide range efficiency is realized

The Toshiba compressor enables the adoption of a high-pressure refrigerant. High efficiency is evident in low speed operation ranges. It can reduce energy consumption when operated in stable conditions.

High power

High Efficiency

Rotation with two rollers makes accurate compressor rotation possible with less energy loss. As a result, it offers a great reduction in energy consumption, yet with very powerful operation.

comfort

High reliability & Low noise

The enhanced DC twin-rotary compressor delivers stable performance with minimum friction. Ideal for noise-sensitive applications. The sound of the outdoor unit is almost imperceptible.

HFC
R-410A

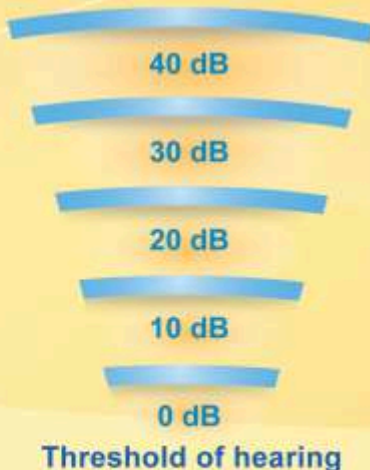

Non-flammable & non-ozone depletion

Use of R-410a refrigerant which is confirmed to be non-ozone depleting, non-flammable and non-toxic.
